

Press release

Construction Simulator® 3

Most recent part of the popular simulation game series starts off today within a brand-new European setting!

Moenchengladbach/Germany, April 10, 2019 – astragon Entertainment und weltentbauer. Software Entwicklung are very happy to announce the launch of the most recent part of the popular Construction Simulator® game series today. **Construction Simulator® 3** for iPhone® and iPad® as well as smartphones and tablets using the Android™ operating system is available now on the Apple® App Store® and on Google Play®.

Please take a look at the many new features of **Construction Simulator® 3** in the official launch trailer: <https://youtu.be/8kTW5gZvG6g>

After exciting construction works in the fictional US state Westside Plains in **Construction Simulator® 2**, the successful Construction Simulator® series makes a return to the European continent in **Construction Simulator® 3**. Players will discover the pastoral region of Illertal including the town of Neustein along with its industrial zone, and the nearby village of Peckling am See.

In 70 challenging missions, the 10km² (3.8mi²) large, freely drivable game world offers players many opportunities to work their way up from a small service provider to the largest construction magnate of the region.

For the successful completion of these diverse missions, players can look forward to operating more than 50 officially licensed building machines and vehicles typical for the region by world-famous manufacturers and brands such as Caterpillar, Liebherr, CASE, Bobcat, PALFINGER, STILL, MAN, ATLAS, Bell, BOMAG, WIRTGEN, VÖGELE, HAMM and MEILLER Kipper.

Examples are the E55 compact excavator or the T590 compact track loader by Bobcat whose strength lies in tasks such as gardening and landscaping, while the trucks by MAN are perfectly suited for visiting the local gravel pit or builder's merchant to procure new construction materials. A 150 EC-B 8 rotating tower crane makes working in lofty heights easy as a breeze.

An absolute gem of the extensive vehicle fleet in **Construction Simulator® 3** is the Liebherr LB28 rotary drilling rig, which the player can use for deep foundations in bridge building and other exciting missions. Another new feature will satisfy a long-standing wish of the Construction Simulator® community regarding the mobile games of the series: A detailed cockpit view complete with faithfully recreated controls in all of the game's vehicles!

Construction Simulator® 3 for iPhone® and iPad® as well as smartphones and tablets using the Android™ operating system is available now for of 4.99 EUR / 3.99 USD / 3.99 GBP on the Apple® App Store® and Google Play®.

Construction Simulator® 3 for iPhone® and iPad® on the Apple® App Store®:
