

## Press release

### Truck Simulation 19

## West coast of USA available as of now

**Moenchengladbach/Germany, May 22, 2019** – Let's soak up the sun: Starting today, the newest free update for **Truck Simulation 19** by publisher astragon Entertainment and developer Jujubee takes players to the sunny US West Coast. This also means that owners of the base game can now access the whole US mainland - without any additional loading times! In addition to the map extension spanning five new US states and seven cities, virtual truckers will also be able to accept some new and exciting missions.

Since the initial release of **Truck Simulation 19** in November 2018, players have been able to drive along the iconic highways of the USA on their mobile devices. The latest update adds the whole West Coast to the game and gives tireless truck drivers even more miles to explore. Famous cities such as Seattle, San Francisco, Los Angeles and Las Vegas become new delivery points for a wide range of goods in **Truck Simulation 19**.

The famous US West Coast as well as the vast Mountain States are sure to delight players with lots of scenic attractions. Whether they are looking for coasts, forests or deserts, the states of Washington, Idaho, Oregon, Nevada and California always manage to bring an impressive variety into the everyday life of a hardworking trucker. Additional racing missions provide new challenges for high-speed fans.

The new update completes the freely drivable game world consisting of the whole US mainland. From the newly introduced West Coast to the East Coast and from the Canadian border in the North to the Mexican border in the South, truck drivers now have ample space to become the biggest hauler of the USA.
